Introduction

The Lane Regional Air Protection Agency (LRAPA) was created in 1968 to improve and maintain air quality in Lane County. This is done in a manner that reflects local priorities and goals while meeting federal and state air pollution control requirements and health-based standards.

With the support of its member jurisdictions – Lane County and the cities of Eugene, Springfield, Cottage Grove and Oakridge – LRAPA carries out its mission to protect and enhance air quality through a combination of regulatory and non-regulatory programs and activities.

The nine-member LRAPA Board of Directors is the policy-making arm of the agency. Membership includes four representatives from the city of Eugene, two representatives from the city of Springfield, and one each from Lane County, the city of Cottage Grove, and the city of Oakridge.

The agency also relies on additional public input from its Citizen Advisory Committee, which includes representatives from industry, environmental concerns, public health, fire suppression, agriculture, community planning and the general public.

Functions

The Board of Directors appoints the agency director, who hires and directs LRAPA's professional and technical staff to work in the following areas:

Compliance Operations

Compliance Operations includes permitting, compliance and enforcement. Permitting establishes conditions under which regulated industrial sources may operate to minimize air pollution. Compliance is assured through inspections and enforcement actions taken to correct violations as needed. Special programs include asbestos abatement regulation and enforcement of open burning rules and regulations.

Monitoring and Data Management

Monitoring provides air quality data via a network of equipment which operates 24 hours/day, seven days/week. Monitoring and meteorological equipment is located at key sites throughout Lane County. Air quality data are reported daily by the news media and are available continuously on the LRAPA website. Data are used to evaluate progress in improving air quality and to determine whether federal air quality standards are being met.

Public Outreach, Planning and Administration

Public outreach promotes understanding of the causes of air pollution and compliance with regulations, and methods of pollution prevention through various educational strategies. LRAPA speakers are available upon request. Air quality planning identifies present and future air quality problems, and develops management and control strategies to improve and maintain air quality in Lane County.

The administrative staff provides support to all external services, handles complaints from the public, provides financial services and human resource management support.
