## UPDATE ON SOME NATIONAL ISSUES OF LRAPA INTEREST

The National Association of Clean Air Agencies (NACAA, the organization of state and local air directors) publishes an information packed *Washington Update* every Friday. Here are the weekly highlights from recent weeks, from most recent to oldest.

But first these timely words from NACAA Executive Director Miles Keough this past week:

Clean air agencies,

Like many of you, the NACAA team is working remotely and stumbling through the challenges, joys, and occasional ridiculousness of being stuck at home. Three weeks ago we didn't mention anything about COVID-19 in our *Washington Update*; this week it's in half our *Washington Update* stories. A lot of our agencies are part of state and local public health agencies (you're the actual Front Line, and we appreciate you so much!) It's getting closer to home too: we're pulling for several EPA staff who have come down with it (as have my both of my sisters, who are thankfully past the worrying part now.) We've all got a long stretch ahead of us, and yet already I find myself asking when we can get back to "normal". Some things have been worth discovering: plenty of those meetings \*could\* have been emails after all; homeschooling my kids has been bananas but I've learned so much doing it; and in the time I used to spend commuting, I've found time to get into a book on the lives of Greek philosophers! And I've definitely come to appreciate even more how lucky America is to have a group of the smartest, most committed people – you - working hard to protect the health of our neighbors and our communities. On the other side of this, what will "normal" even look like? Maybe we'll emerge with healthier habits, stronger teams, closer families, broadened perspectives, and a deeper appreciation by our leaders and partners about the work you do. "No man steps in the same river twice" – that's Heraclitus – "for it is not the same river, and he is not the same man."

Friends, be kind, stay safe; be brave, stay well! My thanks for all you do, Miles

## **PUBLIC INFORMATION – Travis Knudsen**

### **On-Going**

**COVID-19** has had a substantial impact on LRAPA’s day-to-day dealings. On March 18<sup>th</sup> LRAPA closed the office to non-appointment foot traffic, at this time about half of staff members began to work from home on a full-time basis. Operations were limited further on March 24<sup>th</sup> after Governor Kate Brown’s stay-at-home order. The remainder of LRAPA’s staff began working from home. Currently all but two staff members work primarily from home with an occasional visit to LRAPA’s office for essential items which can’t be completed remotely.

Despite an altered workflow, LRAPA remains operational. Compliance and complaint response efforts continue. Title V and ACDP permitting work continues as well. Permitting staff have prioritized the processing of constructions notices, permit modifications, and new permit applications during this time. Monitoring and data control continue as normal. Homewood heating and outdoor burning programs continue to function as well.

COVID-19 has cancelled or postponed many events and meetings for LRAPA. Many – such as the Home Show – are large outreach opportunities for the agency. Alternative public education opportunities, particularly in a virtual space are being researched and brainstormed.

### **Asbestos**

Mail outs of asbestos informational packages to Lane County residents who received building permits for remodeling projects and new homeowners. Residents are directed to contact LRAPA with any questions. Residents of the cities of Eugene, Springfield and Coburg now receive information with their permits. LRAPA will keep the local planning departments and contractors, upon request, stocked with the fliers so that they can help get the word out to residents who might encounter asbestos-containing materials while remodeling their homes.
