Meeting ID: 292 371 838 209 897
Passcode: KM3XR7DF

In-Person Participation
LRAPA
1010 Main Street
Springfield, Oregon 97477

[Note: Start times for agenda items are approximate]

CALL TO ORDER:

1. **Call to Order/Roll Call** (12:15 p.m.)
2. **Adjustments to Agenda** (12:15 p.m.) Pg 1-3
3. **Public Participation (time limited to three minutes per speaker)** (12:15 p.m.)
   (Note: This is an opportunity for the public to speak on both scheduled and unscheduled items. The Board may not act at this time but, if it is deemed necessary, place such items on future agendas. Issues brought up under this agenda item are to be limited to three minutes speaking time by the person raising the issue. If additional time is necessary, the item may be placed on a future agenda.)
4. **Comments from Board Members** (12:20 p.m.)
   (Note: This is an opportunity for Board Members to speak on items from today's public comments or written comments they have received. The board may not act at this time but if it deems necessary place such items on future agendas.)
5. **Approval of Meeting Minutes** (12:25 p.m.) Pg 4-8 *Potential Action*
   A. October 8, 2026 Meeting Minutes
   B. Board Discussion
6. **Recess Regular Board Meeting** (12:30 p.m.)

   EXECUTIVE SESSION:

   The Lane Regional Air Protection Agency's Board of Directors will now meet in executive session pursuant to *ORS 192.660(2)(i)*, to review and evaluate the employment-related performance of the chief executive officer of any public body, a public officer, employee or staff member who does not request an open hearing.
7. **Reconvene Regular Board Meeting** (1:00 p.m.)

8. **Executive Director Performance Evaluation** (1:00 p.m.) *Potential Action*
   A. Chair Keating
   B. Board Discussion

9. **Title 43 Asbestos Rules, Public Hearing** (1:05 p.m.) *Public Hearing*
   A. Public Testimony
   B. Close of Hearing
   C. Board Discussion

10. **Approval of Financial Report** (1:15 p.m.) Pg 9 *Potential Action*
   A. Betty Nielsen
   B. October 2026 Financial Report
   C. Board Discussion

11. **Directors Report** (1:20 p.m.) Pg 10-29 *Information*
   A. Travis Knudsen
   B. Report on October 2026
   C. Board Discussion

12. **Citizens Advisory Committee** (1:25 p.m.) Pg 30 *Information*
   A. Kelly Wood
   B. Report on October 2026 Meeting
   C. Board Discussion

13. **Artificial Intelligence at LRAPA** (1:30 p.m.) *Information*
   A. Travis Knudsen
   B. Presentation
   C. Board Discussion

14. **Board Member Service Recognition** (1:50 p.m.) *Information*
   A. Director Keating
   B. Staff Report
   C. Board Discussion

15. **Future Board Agenda Items** (1:55 p.m.) Pg 31 *Information*
   A. Director Keating
   B. Board Calendar
   C. Board Discussion

16. **Adjournment** (2:00 p.m.)

We endeavor to provide public accessibility to LRAPA services, programs, and activities for people with disabilities. People needing special accommodations to participate in LRAPA public hearings such as assistive listening devices or accessible formats such as large print, Braille, electronic documents, or audio tapes, should please contact the LRAPA office as soon as possible, but preferably at least 72 hours in advance. For people requiring language interpretation services, including qualified ASL interpretation, please contact the LRAPA office as soon as possible, but preferably at least 5 business days in advance so that LRAPA can provide the most comprehensive interpretation services available. Please contact the LRAPA Nondiscrimination Coordinator at accessibility@lrapa-or.gov or by calling the LRAPA office at 541-

736-1056.

Nos esforzamos por proporcionar accesibilidad pública a los servicios, programas y actividades de LRAPA para personas con discapacidades. Las personas que necesiten adaptaciones especiales, como dispositivos de asistencia auditiva, formatos accesibles como letra grande, Braille, documentos electrónicos o cintas de audio, deben comunicarse con la oficina de LRAPA con al menos 72 horas de anticipación. Para las personas que requieren servicios de interpretación de idiomas, incluyendo la interpretación calificada de ASL, comuníquese con la oficina de LRAPA al menos con 5 días laborables de anticipación para que LRAPA pueda proporcionar los servicios de interpretación que sean lo más completos disponibles. Para todas las solicitudes, envíe un correo electrónico al Coordinador de Antidiscriminatoria de LRAPA a accessibility@lrapa-or.gov o llame a la oficina de LRAPA al 541-736-1056.

BOARD OF DIRECTORS
MEETING MINUTES
OCTOBER 8, 2026
MEETING VIA TEAMS / LRAPA OFFICE, SPRINGFIELD OREGON

ATTENDANCE	
BOARD PRESENT:	**STAFF PRESENT:**
Matt Keating, Chair	Travis Knudsen, Executive Director
David Loveall, Vice-Chair	Lance Giles, Technical Services Manager
Bryan Cutchen	Max Hueftle, Operations Manager
Jared Hensley	Emma Lindemann, Board Coordinator
Michael Johnston	Jaime McEvoy, Environmental Coordinator II
Nicole Ngo	Marcia Miller, Permit Writer
Dylan Plummer	Rachelle Nicholas, Administrative Manager
Jim Settelmeyer	Betty Nielsen, Finance Manager
Alan Stout	Mandy Ramirez, Field Inspector & Compliance Officer
	Robbye Robinson, Finance Specialist
	Matt Sorensen, Public Affairs & Project Manager
	Colleen Wagstaff, Enforcement & Asbestos Manager
BOARD ABSENT/EXCUSED:	**OTHERS PRESENT:**
None.	Kelly Wood, Citizens Advisory Committee (CAC) Chair
	Joseph Blake, ATEZ Inc., Public
	Shane Heflin, ATEZ Inc., Public
	Ashli Blow, Lookout Eugene, Guest

AGENDA	ACTION
REGULAR MEETING	
1. Call to Order/Roll Call	**Chair Keating** called the regular meeting to order at 12:15 p.m. A quorum was confirmed with all Board members present.
2. Adjustments to Agenda	**Chair Keating** announced the addition of a public hearing on proposed amendments to LRAPA Title 43 -Asbestos Requirements, noticed on September 4, 2026, as Item 5 on the amended agenda. The item was for public testimony only, and the Board would take no action.

3. Public Participation	None. **Chair Keating**, without objection, held space at the end of the meeting for any late public comment, given the hybrid format.
4. Comments from Board Members	None.
5. Public Hearing: Proposed Amendments to LRAPA Title 43 A. Chair Keating, Travis Knudsen B. Public Testimony	**Chair Keating** opened the public hearing on proposed amendments to LRAPA Title 43 -Asbestos Requirements, noting the Board would take no action. **Travis Knudsen**, Executive Director, reported that LRAPA found the documents posted with the notice did not fully reflect the proposed rule, including the absence of the fee table. A corrected notice will be issued October 9, 2026, restarting the comment period that was to end October 15. A new public hearing is planned for November 12, 2026, at 12:15 p.m., with written comments accepted through November 19, 2026, at 5:00 p.m. The one comment received to date will remain part of the record. No one in the room or on Teams testified. **Chair Keating** closed the hearing at 12:20 p.m.
6. Approval of Meeting Minutes A. September 10, 2026 Meeting Minutes B. Board Discussion	**MOTION: Vice-Chair Loveall** moved, and **Director Hensley** seconded, to approve the September 10, 2026 Meeting Minutes as presented. The motion passed unanimously.
7. Directors Report A. Travis Knudsen B. September Directors Report C. Board Discussion	**Travis Knudsen**, Executive Director, presented the Director's Report. The Eugene-Springfield area had 29 Good air quality days in September and one Moderate day; Oakridge and Cottage Grove stayed Good all month. **Mr. Knudsen** noted that, although Title 47 opens the outdoor burning season October 1, LRAPA's authority covers only smoke and is secondary to the fire authority; ODF and the Lane County Fire Defense Board have fire season continuing, with a change anticipated in mid-October. **Mr. Knudsen** explained that the Title 43 asbestos requirements rulemaking is being re-noticed to correct an error in the draft originally noticed. It was noted that he and **Matt Sorensen** met with Speaker Julie Fahey, Representative Lisa Fragala, and Senator Floyd Prozanski. **Mr. Knudsen** also reported upcoming Cleaner Air Oregon work related to Hexion, a second EPA time-critical removal action at the J.H. Baxter site, the move to every-other-Friday payroll, a visual refresh of LINFO, and staff asbestos and leadership training. The FY26 audit with Pauly Rogers is underway, and the firm has flagged a concern about meeting the December 31 deadline because it is new to LRAPA's systems; he said LRAPA is not the cause of any delay. In response to **Director Cutchen, Mr. Knudsen** confirmed LRAPA would file any extension request with the state, and it was noted the state prefers requests before October 31.

8. Citizens Advisory Committee A. Kelly Wood B. Report on September 2026 Meeting C. Board Discussion	**Kelly Wood**, CAC Chair, reported on the September 29, 2026, meeting, at which **Max Hueftle**, Operations Manager, presented on gasoline dispensing facilities and the 14 proposed rule changes outlined in the LRAPA "Roadmap" summary of proposed changes, and the CAC voted to advance them to the Board. Ben Larson stepped down, leaving the agricultural seat vacant. A member of the public raised concerns about industry's inclusion on the CAC, including potential intimidation and exclusion and a perceived conflict of interest, and suggested a separate group for industry. The CAC plans to take up the topic at a future meeting. **Chair Keating** said he looked forward to a broader conversation. **Vice-Chair Loveall** stated for the record that having industry and concerned citizens together is a form of balance. **Director Hensley** noted that an industry member chaired the CAC for almost a decade with excellent results, and **Chair Keating** added that the City of Eugene also has boards with industry representatives.
9. Approval of Financial Report A. Betty Nielsen B. September 2026 Financial Report C. Board Discussion	**Betty Nielsen**, Finance Manager, presented the September 2026 Financial Report. At about 25 percent of the year, spending was about 21 percent of budget in the General Fund, 16 percent in special revenue, and 7 to 8 percent in the grant fund (about 16 percent overall). Personnel costs reflect vacation payouts for five employees, and General Fund capital outlay is nearly $77,000 of $80,000 for a vehicle and a refurbished server. **Mr. Knudsen** thanked Lance Giles, Technical Services Manager, for working through the warranty terms on the server. In response to **Director Cutchen**, Ms. Nielsen said staff have no concerns at this point about the Targeted Airshed Grant (TAG) 2 deadline and plan to request a one-year no-cost extension after the new year, as Region 10 recommended, though EPA headquarters is scrutinizing such requests more closely. **MOTION: Vice-Chair Loveall** moved, and **Director Stout** seconded, to approve the September 2026 Financial Report as presented. The motion passed unanimously.
10. Approval of Local Dues for FY'28 A. Travis Knudsen B. Staff Report C. Board Discussion	**Travis Knudsen**, Executive Director, presented the FY'28 partner dues, previewed in September. The IGA requires notice to partners by April 15, 2027, but partners prefer fall notice. Using the per-capita method reaffirmed in February 2025, a 3.0 percent Western Region CPI adjustment produces a rate of $0.5895 per person and total dues of $224,943.76, up $6,087.12 (2.8 percent). **Mr. Knudsen** emphasized that dues keep Clean Air Act and state program work under local governance rather than DEQ, and are a sizable part of the roughly $1.4 million non-federal maintenance of effort needed to keep LRAPA's noncompetitive Section 105 base grant. Board members appreciated the early notice. **Director Settelmeyer** noted the CPI-based formula suits partners like Cottage Grove with limited ability

	to raise funds. **Chair Keating** emphasized that partner dollars allow LRAPA to leverage federal funding. **MOTION: Vice-Chair Loveall** moved, and **Director Hensley** seconded, to adopt the FY'28 partner dues as presented, totaling $224,943.76, and direct the Executive Director to notify all partner jurisdictions. The motion passed unanimously.
11. GDF & Air Quality Rules Cleanup Rulemaking, Hearing Request A. Max Hueftle B. Staff Report, Presentation C. Board Discussion	**Max Hueftle**, Operations Manager, presented the 2026 Permitting Rulemaking Package and requested authorization to hold a hearing. If authorized, the hearing would be held November 12, written comments would close December 16, and staff would return for adoption in January. The 14 highlighted changes include lowering the crematory afterburner temperature to 1,600 degrees (House Bill 3729); repealing LRAPA's solid and infectious waste incinerator and PM10 contingency rules; removing excess emissions affirmative defense provisions, as DEQ has; replacing LRAPA's gasoline dispensing facility rules with DEQ's 2024 rules by reference; updating PM2.5 and sulfur dioxide standards; and permitting changes matching DEQ, including optional renewal applications for general ACDPs, a one-ton-per-year level for coffee roasters, and a new Basic ACDP category. The package also includes the ACDP annual fee increase adopted in September, along with fee class changes for gas stations, emergency generators, and fiberglass sources, a greenhouse gas reporting fee of 20 percent of the annual fee, and a 3 percent Cleaner Air Oregon activity fee increase. The full crosswalk contains 79 changes across 12 titles. **Mr. Hueftle** reported that the CAC, which reviewed the package at a special meeting on July 28 and its September 29 meeting, voted unanimously to advance it and recommended direct notice to permit holders and industry associations, which staff will provide. No Board questions were raised. **MOTION: Vice-Chair Loveall** moved, and **Director Cutchen** seconded, to authorize a public hearing on the proposed amendments in the 2026 Permitting Rulemaking Package at a regular Board meeting following public notice, targeted for November 12, 2026, and direct staff to publish public notice. The motion passed unanimously.
12. 2 Cycle Equipment Emissions A. Matt Sorensen B. Staff Report C. Board Discussion	**Matt Sorensen**, Public Affairs & Project Manager, presented an informational report, with no recommendation, responding to a community member's June request that the Board consider banning gas-powered leaf blowers. The CAC reviewed the topic in 2021 and recommended public education. **Mr. Sorensen** noted that two-stroke engines produce a significant share of non-road equipment emissions, harming operators and neighbors, but that engines under 25 horsepower are regulated federally, only California may set its own standards, and LRAPA has no small engine rules. A countywide rule would require significant legal review and be hard to enforce; cities are better positioned

	to act through code. Portland is phasing out two-cycle equipment, and staff recommend continued public education. **Chair Keating** asked about enforcement of fire-season restrictions; **Mr. Sorensen** said ODF and local fire authorities enforce them and LRAPA has no formal role. **Director Ngo** noted fact sheet statistics may need refreshing. Directors agreed education is welcome and a LRAPA rule may be premature, that cities should lead by example, and that battery recycling and fire risks deserve attention. **Director Cutchen** left the meeting at the conclusion of this item.
13. Interagency Portable Source Coordination A. Travis Knudsen, Max Hueftle B. Staff Report C. Board Discussion	**Travis Knudsen**, Executive Director, presented an informational report responding to **Director Cutchen**'s question about the dual DEQ and LRAPA permit requirement for portable sources such as rock crushers and air curtain incinerators. From 2008 to 2024, one permit could cover both agencies, but differences between the rule sets made it unworkable; DEQ removed the provision in 2023 and LRAPA followed in 2024. LRAPA permits are legal documents the agency needs in order to enforce in Lane County. LRAPA permits 23 portable sources (about 8 percent of its permits), with fees of about $61,700 per year, and at least half also hold DEQ permits. **Director Stout** asked whether DEQ would split fees, citing operators near the Linn County line. **Mr. Knudsen** said DEQ is unlikely to, but LRAPA could explore administrative discounts for sources holding a DEQ permit. **Mr. Hueftle** said sources had not expressed frustration about dual permits; air curtain incinerator permittees had raised the cost of the permit itself.
14. Future Board Agenda Items A. Director Keating B. Board Calendar C. Board Discussion	**Chair Keating** encouraged directors to email agenda item requests to him, **Vice-Chair Loveall**, or **Mr. Knudsen**, and requested more media engagement and sharing of earned media with the Board. **Mr. Knudsen** highlighted the October 7 newsletter story on 9wood, a permitted source whose new dust control system turns sawdust into briquettes instead of landfill waste, and agreed to forward it to the Board. **Chair Keating** also asked staff to explore holding a 2027 Board meeting in the field, such as in Oakridge or Cottage Grove; **Mr. Knudsen** noted that public meetings law requires public access and a virtual option at any site.
15. Adjournment	**Chair Keating** adjourned the meeting at 1:22 p.m.

(Minutes recorded by Emma Lindemann)

1. The General Fund Personnel Services line item is at 91.31% and Capital Outlay is at 288.57% of our targeted amount of 33.33% for October.

2. The Special Revenue (Title V) Fund Personnel Services line item is at 77.90% of our targeted amount of 33.33% for October.

3. Grant Fund of Personnel Services line item is at 155.03% or our targeted amount of 33.33% for October.

LRAPA BOARD OF DIRECTORS AGENDA ITEM SUMMARY

LRAPA
Lane Regional Air Protection Agency

Director's Report for October 2026

Meeting Date: November 12, 2026
Department: Director's Office
lrapa-or.gov

Agenda Item No. 7
Staff Contact: Travis Knudsen
541-736-1056 ext. 217

I. EXECUTIVE HIGHLIGHTS

Key accomplishments, challenges, and priorities from the past month.

EXECUTIVE SUMMARY

October brought more Moderate days as the season turned. Eugene-Springfield recorded 24 Good days and 7 Moderate days, peaking at an AQI of 59 on October 21. Oakridge and Cottage Grove each peaked at 58 in the last days of the month. Fine particulate drove every Moderate day. LRAPA issued no advisories and called no Yellow or Red home wood heating days. Fire season ended in mid-October, and the fall backyard burning window ran from October 17 through October 31. Staff received 64 complaints in October, 38 of them about outdoor burning. Outdoor burning complaints now total 327 for the year, more than any full year since at least 2021.

Three Title V permits and 42 ACDPs have been issued year to date. The permit backlog stands at 8 percent against a 20 percent target. The Grain Millers renewal is on public notice through November 18, and comment closed October 14 on the general permit renewal covering 111 gasoline stations. Staff have issued 40 notices of noncompliance and warnings this year, the most of any year since 2020. Enforcement detail is in Attach. No. 3.

Staff joined EPA's J.H. Baxter core team meeting as EPA prepares to remove up to 15 feet of contaminated soil, and continued to follow ODF's Smoke Management rules update. Matt Sorensen presented at the Residential Wood Heating Conference, spoke on a Department of Human Services panel, and installed indoor and outdoor PurpleAir sensors at the Campbell Community Center. At the Pacific Northwest Air & Waste Management conference in Anchorage, LRAPA staff gave three presentations. They covered woodstoves and wildfire smoke, Oregon's first approved drone methane monitoring at Short Mountain Landfill, and AI adoption in a regulatory agency.

Seven staff attended DEQ's fall inspector and permit writer forum, and two staff completed the Cascade Health leadership series on November 3. LRAPA also met with IEQ Technology, a Springfield software firm, about longer-term support for the LINFO database.

Four months into FY27, spending is below the year-to-date target in every fund. All funds together sit at 60.5 percent of target, and a new truck and server account for most of this year's capital budget. The FY26 audit will likely finish after the State's December 31 deadline, because no auditor can issue a single audit until the federal Office of Management and Budget publishes its final 2026 Compliance Supplement, and that release has no date.

This month the Board will hold the public hearing on the proposed Title 43 Asbestos Requirements and act on the October financial report. The Board is scheduled to consider adoption of the asbestos rules in January. Staff will brief the Board on AI at LRAPA, and the Board will recognize Director David Loveall for his years of service to LRAPA and to clean air in Lane County.

II. PROTECTING PUBLIC HEALTH & SERVING OUR COMMUNITY

Aligns with Customer/Stakeholder Perspective of the Balanced Scorecard framework and LRAPA's current goals 1, 2, and 5 which focus on public health protection, community engagement, and stakeholder relationships.

II.A. Air Quality Status & Trends for October 2026

*These metrics support **Goal 1 (Public Health Protection and Air Quality Education)** and **Goal 4 (Regional Air Monitoring and Analysis)**, tracking our performance against targets for "Good" and "Moderate" AQI days, data completeness, and timely reporting).*

October

Site	Date	Max AQI	Pollutant
Eug/Spfld	21-Oct-26	59	PM
Oak	30-Oct-26	58	PM
CottGrv	31-Oct-26	58	PM

AQI	Eug/Spfld	Oak	CottGrv	AQI Range	PM2.5 Range, ug/m3	Ozone Range, ppb
Good	24	25	27	0-50	0-9	0-54
Moderate	7	6	4	51-100	9.1-35.4	55-70
USG	0	0	0	101-150	35.5-55.4	71-85
Unhealthy	0	0	0	151-200	55.5-125.4	86-105
Very Unhealthy	0	0	0	201-300	125.5-225.4	106-200
Hazardous	0	0	0	301+	225.5+	201+

II.B. Community Response & Complaint Resolution

*This section supports **Goal 1 (Public Health Protection and Air Quality Education)** metrics for complaint response to demonstrates our commitment to addressing community concerns promptly and effectively.*

**Note: unique complainants in the (#). Complaints with more than one source type are counted once, under the most specific type.*

Category	Type	Count
Smoke Complaints: 45	Outdoor Burning (37)	38

II.C. Smoke Management & Wildfire Resilience

*This section aligns with **Goal 2 (Enhanced Wildfire Smoke Preparedness)**, tracking our smoke monitoring, advisory issuance, and coordination with state agencies, as well as smoke management activities for outdoor burning and home wood heating.*

Outdoor Burning, 2026-2027 Season

LRAPA regulates outdoor burning in Lane County to protect air quality and public health. Under Title 47, LRAPA has authority to regulate open burning practices, including determining when burns can occur. LRAPA aims to allow burning whenever possible while preventing air quality deterioration. Outdoor burning is only curtailed when monitoring or forecasts show potential for unhealthy air quality impacts.

Periods of Curtailment

Start	End	Areas	Curtailment	Reason
June 1, 2026	Oct. 2026	All Lane County	Full Prohibition	By Rule, Title 47-015(2)

Home Wood Heating, 2026-2027 Season

LRAPA regulates home wood heating under Title 16 to reduce PM2.5 emissions during periods of poor air quality. An advisory system (Yellow/Red Days) indicates when curtailment is needed. Yellow Day advisory request voluntary curtailment of wood burning except for those who depend on it as their primary heat source. Red Day advisories prohibit visible smoke from chimneys, with exemptions for economic hardship. Like outdoor burning, LRAPA only issues wood burning curtailment when air quality monitoring or forecasts indicate potential health impacts.

Periods of Curtailment

Areas	Yellow Days	Red Days
Eugene/Springfield	0	0
Oakridge	0	0

The home wood heating season opened October 1.

Outdoor Burning Letter Permits, 2025-2026 Season

LRAPA has authority to issue outdoor burning letter permits under Title 47. These permits allow specified burning that would otherwise be prohibited. This program also supports ecological benefits of prescribed fire while protecting public health through strict oversight and timing. LRAPA coordinates closely with land managers to ensure burns are conducted with minimal air quality impacts.

Permit No.	Issue Date	Permittee	Location	Material	Volume
20B25-06-01	June 30, 2025	Rivers to Ridges Partnership	85 units in Lane County	Ecological Burning	1456 acres

Wildfire Smoke Intrusions & Air Quality Advisories

LRAPA participates in Oregon's Wildfire Response Protocol for Severe Smoke Episodes, a coordinated system that connects federal, state, and local agencies during significant smoke events. LRAPA's role includes issuing local air quality advisories, coordinating public health messaging, and representing Lane County's interests in state-level response planning.

J.H. Baxter Core Team Meeting (Oct. 6th, Online)
LRAPA Executive Director, and Public Affairs Manager, attended a community engagement meeting led by the EPA, in coordination with Oregon DEQ, regarding cleanup efforts at the J.H. Baxter site. The group discussed recent additional funding for Time Critical Removal Actions, which will allow the EPA to remove up to 15 feet of targeted soil contaminated with creosote and other chemicals. EPA and DEQ staff also addressed questions from community members, so participants could share accurate information with the broader community.

Oregon Dept. of Forestry Smoke Management Rules Advisory Committee (RAC) (Oct. 7th, Online)
Matt Sorensen, Public Affairs Manager, attended the rule development meeting of the Oregon Department of Forestry's Smoke Management Rules Advisory Committee, led by Levi Hopkins (ODF). The RAC is reviewing and updating Oregon's Smoke Management rules, with meetings expected to continue into late fall. LRAPA is monitoring this process closely, as ODF's smoke management rules directly intersect with LRAPA's own prescribed burning permit authority and regional air quality coordination.

Presentation at Residential Wood Heating Conference (Oct. 20th, Portland)
Matt Sorensen, Public Affairs Manager, gave a presentation titled: Woodstoves to Wildfire- Rethinking Community Air Quality Improvement Strategies. The presentation highlights how communities like Oakridge have made real progress cutting wintertime PM2.5 through woodstove changeouts, home energy upgrades, and local air quality initiatives. But intensifying wildfire smoke, often originating far outside the region, is increasingly overwhelming those local gains and how improving long-term air quality will require pairing community-level interventions with landscape-scale wildfire risk reduction.

Panel Member for Dept. of Human Services Mini-Conference (Oct. 29th, DHS Springfield)
Matt Sorensen, Public Affairs Manager, participated in a panel for the Dept. of Human Services' Equity and Inclusion Committee, attended by over 25 DHS staff. The panel also featured two staff from Beyond Toxics. Panelists discussed environmental impacts on the community, how their organizations support efforts to protect public health, and what they're excited to be working on in the coming months and years.

Install 2x PurpleAir Sensors at Eugene Campbell Community Center (Nov. 2nd, Eugene)
Matt Sorensen, Public Affairs Manager, installed two PurpleAir sensors at the Campbell Community Center, one monitors indoor air quality, and one monitors outdoor air quality. The sensors will give staff real-time data to guide decisions about outdoor activity for seniors and staff using the facility, and to help ensure indoor air quality remains safe during wildfire season.

Rivers to Ridges Ecological Burning Meeting (Nov. 4th, LRAPA Springfield)
LRAPA hosted the Rivers to Ridges ecological burn group led by Ian Appow, Upper Willamette Soil & Water Conservation District as they discussed and reviewed the 2026 prescribed burn season. Meetings are held in LRAPA's boardroom as part of LRAPA's community outreach efforts.

Presentation at Pacific Northwest Air & Waste Mgt. Conference (Nov. 5th, Anchorage, Alaska)
Matt Sorensen delivered the Woodstoves to Wildfire- Rethinking Community Air Quality Improvement Strategies presentation at the Pacific Northwest Air & Waste Management Association Conference held in

Anchorage, Alaska. The presentation highlights how communities like Oakridge have made real progress cutting wintertime PM2.5 through woodstove changeouts, home energy upgrades, and local air quality initiatives. But intensifying wildfire smoke, often originating far outside the region, is increasingly overwhelming those local gains and how improving long-term air quality will require pairing community-level interventions with landscape-scale wildfire risk reduction.

Presentation at Pacific Northwest Air & Waste Mgt. Conference (Nov. 6th , Anchorage, Alaska)
Max Hueftle, Operations Manager, presented LRAPA's experience evaluating and approving EPA's Other Test Method 51 (OTM-51). OTM-51 uses drones to perform Method 21 surface emission monitoring at landfills. Short Mountain Landfill wanted to use it, but OTM-51 had not been approved in Oregon, and it was unclear how drone monitoring fit under the state's Landfill Gas Emissions Rule. LRAPA worked with the facility, its consultants, Oregon DEQ, and EPA, and approved conditional use of the method. Short Mountain became the first landfill in Oregon to use drones to meet state and federal surface methane monitoring requirements. Since then the facility has found more methane leaks than traditional monitoring did, including on steep slopes crews could not safely reach before. It has also improved data quality, monitoring efficiency, and worker safety.

Session Chair and Presentation at Pacific Northwest Air & Waste Mgt. Conference (Nov. 6th, Anchorage, Alaska)
Travis Knudsen, Executive Director, chaired the session on Artificial Intelligence and Other Tools for Regulators and presented on AI adoption in regulatory agencies. The talk drew on LRAPA's spring staff survey. Many staff treat AI as an answer box. They try it once, get an imperfect result, and step away. Staff who treat AI as a thinking partner and work through problems with it report skill growth, better work, and time saved. The presentation explored what that shift asks of any workforce. Agencies need to decide which skills to build through iterative work with AI and which to keep in human practice by design. Attendees left with a working frame, examples from LRAPA, and practical changes for their own AI use.

III. MAINTAINING REGULATORY EXCELLENCE

Aligns with Internal Process Perspective of the Balanced Scorecard framework and LRAPA's current goals 3 and 4—ensuring compliance with air quality standards through effective monitoring, permitting, and enforcement.

III.A. Stationary Source Permitting Progress & Efficiency

*This section supports **Goal 3 (Regulatory Compliance, Permitting, and Industrial Emissions Management)** metrics for permit issuance timeliness, permit backlog rate, and area NAAQS compliance.*

Permitted Sources

- Currently 15 sources hold a Title V operating permit in Lane County.
- Currently approximately 275 sources hold an ACDP.

Permits in Queue			
Category of Permit Activity	**Title V**	**ACDP**	**Total In Queue**
New	-	5	5
Renewals	5	4	9
Modifications	1	2	3
Constructions	1	-	1
Terminated Permits	-	-	-

Stationary Sources Permits Issued, *Year-to-Date*

- Title V Operating Permits: 3
- Air Contaminant Discharge Permits: 42

Permits on public notice from October 1 to October 31, 2026		
Source Number and Name	**Reason for Public Notice**	**Type of Permit**
200059 A&K Development Co/Pacific Metal Fab, LLC	Initial permit	New Simple ACDP proposed for a source already operating, including CAO risk limitations, on public notice August 28, 2026 through October 1, 2026
AQGP-023 and others, Gasoline Dispensing Facility (GDF) General ACDP Renewal	Renewal and modification	General ACDP renewal and modification for 111 GDFs based on DEQ's division 244 rules adopted and effective March 25, 2024 and implemented by reference in Lane County, on public notice September 14, 2026 through October 14, 2026.
203136 Grain Millers, Inc.	Renewal	Simple ACDP renewal on public notice October 15, 2026 through November 18, 2026.

III.B. Asbestos Program Oversight

*This section supports **Goal 3 (Regulatory Compliance, Permitting, and Industrial Emissions Management)** initiatives related to operating the asbestos program, including inspections and rule updates. LRAPA protects public health from asbestos*

hazards through effective oversight and education.

LRAPA administers the asbestos program in Lane County under title 43. This program regulates the handling, removal, and disposal of asbestos-containing materials to prevent public exposure to this hazardous substance. LRAPA reviews asbestos survey reports, processes abatement notifications, conducts inspections, and enforces compliance with asbestos regulations to protect workers and the public.

Asbestos Notices
October 1, 2026 to October 31, 2026

IV. STRENGTHENING ORGANIZATIONAL CAPACITY

Aligns with Learning & Growth Perspective of the Balanced Scorecard framework and LRAPA's current goal 6—developing staff capabilities and improving operational systems.

IV.A. Staff Development & Agency Growth

*This section supports **Goal 6 (Organizational Excellence and Operational Efficiency)** metrics focused on staff retention, professional development, and employee satisfaction, essential for achieving operational excellence.*

LRAPA maintains a skilled workforce to carry out our mission of protecting air quality in Lane County. This section provides an overview of our current staffing levels, vacancies, and professional development activities. Our commitment to staff development ensures we have the expertise needed to address complex air quality challenges effectively.

Department	FTE	Vacancies
Administration	5.0	0.0
Operations	10.0	2.0
Finance	2.0	0.0
Technical services	2.0	0.0
Total	**19.0**	**2.0**
Agency at 89% of staffing capacity		

LRAPA currently maintains 19.0 FTE across four departments. We presently have 17.0 FTE filled, representing 89% of our authorized staffing capacity.

Two positions continue to be held vacant as a cautious approach to maintain financial flexibility while ensuring LRAPA can continue delivering essential air quality protection services to Lane County.

LRAPA remains committed to thoughtful workforce planning and staff development strategies that balance operational needs with fiscal responsibility during this period of budget uncertainty.

Rocky Mountain Wildfire Smoke Symposium	1	October	Montrose Lab/Colorado Department of Public Health and Environment
Residential Wood Heating Conference	2	October	Northeast States for Coordinated Air Use Management

DEQ Fall AQ Inspector/Permit Writer Forum (October 6th-8th, virtual)
Staff attended this three-day Oregon Department of Environmental Quality forum designed for air quality inspectors and permit writers. Day One covered regional updates, Office of Equity overview, Excel and Word efficiency tools for permit writing, digital accessibility standards for tables, and the permitting process. Day Two addressed Compliance Assistance Office updates, NEWT system and TACT determination procedures, the 2026 Air Toxics Emissions Inventory, the AQ Dashboard tool, effective inspection report writing, and consistency procedures for entering inspection data in YDO (Oregon's inspection tracking system). Day Three included Emission Factor Inventory updates, air quality modeling comparisons across regions, summary findings from recent listening sessions, Climate Protection Program updates, and recent rule changes affecting landfill and crematory operations. This comprehensive forum strengthened LRAPA staff knowledge of current state regulatory procedures, tools, and emerging regulatory issues affecting air quality operations and permitting.

How Is Air Monitoring Used in the Field (October 7th, virtual)
Staff attended this two-hour EnviroClass webinar addressing air quality monitoring from three connected perspectives: regulatory requirements, monitoring technology, and real-world field application. The training covered how monitoring technology can support different air quality objectives, how site and regulatory conditions influence monitoring strategies, practical considerations when monitoring under real-world field conditions, and lessons learned from complex environmental projects. Speakers included regulatory, technology, and field experience perspectives from Colorado and commercial providers. This training strengthens staff capacity to develop effective monitoring strategies and implement air quality monitoring under challenging field conditions

Cascade Health Leadership Development Series-Fall 2026 (September 22nd-November 3, 2026, in-person)
Staff enrolled in the seven-session Cascade Health Leadership Development Series designed for supervisors and managers. The series covers essential leadership competencies including leading with emotional intelligence, recognizing and addressing stress and burnout in the workplace, adapting leadership style to different situations and team needs, navigating conflict constructively, coaching and providing corrective feedback, building belonging and inclusion in diverse workgroups, and managing organizational change and transitions. Through interactive sessions and practical frameworks, participants develop skills to build trust, engagement, and accountability while supporting employee growth and team performance. This professional development strengthens LRAPA's management capacity and supports effective employee relations and organizational effectiveness.

What Oregon Facilities Need to Know Now: TACT, Source Testing, GHG Reporting, and More (October 28th, virtual)
Staff attended this Trinity Consultants webinar covering evolving air quality and environmental compliance requirements affecting Oregon facilities. The training addressed Oregon-specific regulatory updates including

TACT (Toxic Air Contaminant) permitting considerations, source testing requirements and recent developments, greenhouse gas reporting updates, emerging regulatory issues, and practical strategies to help facilities stay ahead of changing requirements. This training keeps LRAPA staff informed of current regulatory developments and emerging compliance issues affecting Oregon facilities and permitting decisions.

Monitoring Compliance Testing & Source Test Observation (October 26th-30th, virtual)
Staff completed this five-day WESTAR course designed for air quality professionals responsible for observing source testing, evaluating source test methods, approving test protocols, and reviewing source test results. The training covered EPA's National Stack Test Guidance and Compliance Monitoring Strategy, source test methods and procedures, development of observer checklists for compliance source tests, EPA stack test methodologies for characterizing hazardous air pollutants, SW-846 Test Methods for solid waste evaluation, and monitoring programs for particulate matter and condensable particulate matter. This comprehensive training strengthens staff capacity to conduct effective source test observations and reviews for compliance determination.

Landfill Gas Control Facilities (October 21st, virtual)
Staff completed this one-day WESTAR course providing an overview of landfill gas control facilities. The training covered scientific principles behind landfill gas generation, primary and secondary air pollutants at landfills, landfill gas collection technologies and principles, landfill gas control devices and energy uses, methane and landfill gas monitoring equipment and proper use, applicable regulations including greenhouse gas regulations, and inspection and safety procedures. This training strengthens staff ability to evaluate landfill operations, assess compliance with landfill gas control regulations, and develop effective permit conditions for landfill facilities.

Principles of Ambient Air Monitoring (October 20th-21st, virtual)
Staff completed this two-day Air Knowledge course on the general principles of ambient air monitoring for criteria pollutants. The training covered regulations and standards governing ambient air monitoring, monitoring network design and requirements, station siting considerations, air monitoring instrumentation, data documentation and handling procedures, quality assurance requirements and methods, and resources for ambient air monitoring. This training enhances staff knowledge of ambient air monitoring requirements and best practices relevant to LRAPA's air quality monitoring and regulatory compliance work.

Rocky Mountain Wildfire Smoke Symposium (October 15th-16th, in-person)
Staff attended the Seventh Annual Rocky Mountain Wildfire Smoke Symposium, organized by The Montrose Lab at Colorado State University in partnership with the Colorado Department of Public Health and Environment. The symposium theme was "National Problem, Local Solutions: Community Wildfire Smoke Preparedness." The event brought together researchers, public health professionals, community leaders, wildland firefighters, and government partners to address the pressing challenges of wildfire smoke in the Rocky Mountain region. Through expert-led sessions and collaborative discussions, the symposium explored health impacts of wildfires, effective strategies for mitigating smoke exposure, and approaches to enhance wildfire resilience and foster community, state, and regional partnerships essential for adapting to a future with more frequent and intense wildfires.

Residential Wood Heating Conference (October 20th-22nd, in-person)
Staff attended this conference hosted by Northeast States for Coordinated Air Use Management in Portland. It brings together air agencies, researchers, and industry to share strategies for reducing residential wood smoke. Matt Sorensen presented Woodstoves to Wildfire, described in Section II.D.

Pacific Northwest International Section of the Air & Waste Management Association Annual Conference
(November 4-6, Anchorage, Alaska)

Max Hueftle, Operations Manager, Matt Sorensen, Public Affairs Manager, Skyler Dean, Permit Writer, and Travis Knudsen, Executive Director, attended this year's PNWIS conference. PNWIS is the regional section of the Air & Waste Management Association, a nonprofit, nonpartisan professional organization. Its territory spans Oregon, Washington, Idaho, Montana, Alaska, British Columbia, and the Yukon. It gives regulators, industry, consultants, scientists, and students a neutral forum to share technical work and compare approaches. LRAPA staff delivered three presentations, described in Section II.D.

IV.B. Operational Improvements & Innovation

*This section supports **Goal 6** (**Organizational Excellence and Operational Efficiency)** metrics for technology adoption and systems modernization, enhancing our efficiency and effectiveness in serving Lane County.*

LRAPA is working to improve our systems and processes to enhance efficiency and effectiveness. These improvements support our ability to fulfill our mission and provide better service to the public. Current initiatives focus on technology upgrades, document management, and standardized procedures.

Current activities underway:

LINFO Database Support
LINFO is LRAPA's internal database. Since LCOG's developer retired, Lance Giles, Technical Services Manager, has kept LINFO running and improving with AI-assisted development, most recently a major platform upgrade. To give LINFO longer-term support, LRAPA invited IEQ Technology, a Springfield software firm, to review the system. IEQ has proposed a first phase of cleanup, security, and bug-fix work, along with planning for a new Enforcement module. Staff are reviewing the proposal now. Any work will begin only after a data handling agreement is in place to protect the personal information LINFO holds.

V. ENSURING FISCAL RESPONSIBILITY

Aligns with Financial Stewardship Perspective of goal 7—managing financial resources effectively and transparently.

V.A. Budget Performance & Stability

*This section supports **Goal 7** (**Financial Sustainability and Transparency**) metrics for budget variance and maintaining adequate reserves (4 months of operating budget), ensuring LRAPA can fulfill its mission consistently.*

A financial report under for this month supports this information. Percentages below follow the financial update convention, which measures actuals against the year-to-date budget target rather than the full annual budget.

FY27 to Date, as of October 31, 2026

The summary below reflects the October report. Thus far into the fiscal year, the year-to-date budget target is 33.33% of the annual budget.

FY27 Line Items to Note: The following line items are above 91% of the year-to-date budget target.

- **General Fund** Personnel Services line item is at 91.31% the year-to-date target, because of paying out five eligible employees 40 hours of their vacation banks through October. Capital Outlay is at 288.57% of our target amount of 33.33% year-to-date target because of the purchase of a new truck ($45,796) and server ($31,148). This is a timing item against an $80,000 annual capital budget, of which $76,944 has been spent.
- **Special Revenue Fund (Title V)**, nothing to report.
- **Grant Fund** Personnel Services line item is at 155.03% the year-to-date target, because of paying out five eligible employees 40 hours of their vacation banks through October.

Federal EPA revenue and most State DEQ revenue have not yet been received, which is normal timing at this point in the year.

FY27 Summary of Expenditures: As of October 31, 2026, spending is below the year-to-date budget target in each of the LRAPA funds.

- **General Fund** Total Actual Expenditures as a % of the year-to-date budget target: **78.39%**
- **Special Revenue Fund** Total Actual Expenditures as a % of the year-to-date budget target: **64.29%**
- **Grant Fund** Total Actual Expenditures as a % of the year-to-date budget target: **26.74%**
- **All Funds Consolidated** Total Actual Expenditures as a % of the year-to-date budget target: **60.50%**

Grant Fund Details

- **Targeted Airshed Grant TAG 2.0** (January 2022 – August 2027), as of October 31, 2026
  - Total grant amount: $2,739,425
  - Spent to date: $987,907
  - Remaining grant balance: $1,751,518
  - Awaiting federal reimbursement: $22,829
  - Percentage of grant awaiting reimbursement: .83%

EPA reimbursement draws are scheduled monthly.

V.B. Financial Transparency & Reporting

*This section supports **Goal 7 (Financial Sustainability and Transparency)** metrics for financial reports provided to the Board (target: monthly) and timely audit completion (target: before December 31). Transparency in financial matters builds trust with our stakeholders and ensures accountability.*

	Status	Completion Date
Budget FY27	Adopted	May 2026
Interim Audit FY26	Complete	July 2026
Audit FY26 (Current Year)	Underway	Delayed, pending federal Compliance Supplement
Budget FY28	To be drafted	March 2027

Auditor Update

The FY26 audit with Pauly Rogers is underway. Staff delivered the trial balance on the auditors' deadline, and work since then has focused on refining finance data as the firm prepares its first audit of LRAPA. That work has included beginning balance testing on the FY2025 balances, an accounts payable reconciliation by fund, bank reconciliation support, and a capital assets review.

A federal delay will likely push the audit past the State of Oregon's December 31 deadline. Because LRAPA spends federal grant funds, its audit includes a single audit, which tests compliance with federal grant requirements. Auditors test against the OMB Compliance Supplement, which the federal Office of Management and Budget updates each year. OMB has released only a draft of the 2026 Supplement and has set no date for the final version. National audit guidance says auditors should not issue a June 30, 2026 single audit until the final version is out. Pauly Rogers has told us it cannot formally issue LRAPA's single audit before then. The firm is planning the engagement from the draft in the meantime. The delay affects every government with a June 30 fiscal year, LRAPA included.

Pauly Rogers is exploring whether to issue the financial audit ahead of the single audit, which could keep the financial statements closer to the State's timeline. The federal deadline to file the single audit is March 31, 2027, nine months after fiscal year end.

VI. LRAPA STRATEGIC GOALS REFERENCE SHEET

These ongoing and sustained goals are designed to ensure comprehensive performance management across four key perspectives. This reference sheet provides an overview of each strategic goal and its associated performance metrics.

MISSION: To protect public health, quality of life and the environment as a leader and advocate for the continuous improvement of air quality in Lane County.

VISION: Community partners working together to ensure clean air for everyone.

GOAL 1: Public Health Protection and Air Quality Education

Protect public health through air quality initiatives and foster community engagement via educational programs, prompt response to public concerns, and efforts to ensure equitable protection from air pollution for all communities.

Lag Indicators	Lead Indicators
- % of days in "Good" or "Moderate" AQI categories by monitoring location (target: 95% annually) - Number of days with PM2.5 or PM10 exceeding NAAQS 24-hour standards (target: 0) - % of complaints responded to (target: 95%)	- Number of educational events/programs conducted quarterly (target: 2 per quarter) - Number of wood heating advisories issued (target: prior to 150 AQI in metro) - Email listserv growth (target: >3% increase annually)

GOAL 2: Enhanced Wildfire Smoke Preparedness

Address the increasing threat of wildfire smoke intrusions to public health in Lane County through public education, collaboration with local jurisdictions, and enhanced monitoring and communication during wildfire events. In addition to seeking funding avenues which directly support this new and growing smoke management service need.

Lag Indicators	Lead Indicators
- Response time to publish smoke advisories during events (target: before 1pm on days needed)	- Maintain LRAPA supported commercial air sensors in Lane County (target: approximately 75) - State smoke advisory engagement (target: 100% participation)

GOAL 3: Regulatory Compliance, Permitting, and Industrial Emissions Management

Ensure compliance with National Ambient Air Quality Standards (NAAQS) and other health-based benchmarks, manage air quality permits for regulated sources, and implement best practices in emissions control, balancing economic development with environmental protection through rigorous permitting processes.

Lag Indicators	Lead Indicators
- % of area in compliance with NAAQS standards (target: 100%) - % of permits issued within target timeframes (target: 90%) - Permit backlog rate (target: <20%)	- Number of annual Full Compliance Evaluations completed vs. EPA committed (target: 100%) - % of enforcement actions resolved within 6 months (target: 80%)

GOAL 4: Regional Air Monitoring and Analysis

Collect, analyze, and report comprehensive air quality data across Lane County to inform policy decisions, alert the public, and track long-term air quality trends.

Lag Indicators	Lead Indicators
- % data completeness for monitoring network (target: >95%) - Timeliness of data reporting to the public and EPA (target: 100% on schedule)	- % of monitors calibrated on schedule (target: 100%) - % uptime for real-time data systems (target: 98%) - Number of monitoring site quality assurance audits completed vs. EPA committed (target: 100%)

GOAL 5: Partnerships and Interagency Coordination

Build and maintain strong relationships with various stakeholders, including industry, local jurisdictions, and community groups, to foster collaboration, improve communication, and ensure that LRAPA's work is responsive to community needs and concerns.

Lag Indicators	Lead Indicators
- Number of industry outreach initiatives completed annually (target: 1 per year) - Number of community outreach initiatives completed annually (target: 1 per year) - Number of partner outreach engagements completed annually (target: 5 per year)	- Diversity of inter-agency meetings attended (target: prioritize local, then state, then federal engagements) - Number of monitoring site quality assurance audits completed vs. EPA committed (target: 100%) - Communication frequency with key stakeholders (target: Quarterly communication) - Number of council presentations delivered (target: 1 per jurisdiction annually)

GOAL 6: Organizational Excellence and Operational Efficiency

Strengthen LRAPA's internal systems, workflows, and operational capacity through technology integration, process improvement, and staff development to enhance organizational effectiveness and service delivery.

Lag Indicators	Lead Indicators
- Employee satisfaction/engagement scores (target: 85% satisfaction) - Staff retention rate (target: >85% annually) - % completion of internal systems modernization (target: 100% of planned upgrades, e.g. LINFO)	- Number of staff professional development training completed (Target: 2 per staff per year) - Number of staff utilizing advancing technologies in workflows (target: > 50%)

GOAL 7: Financial Sustainability and Transparency

Ensure LRAPA's long-term financial stability and improve fiscal transparency through diversified funding sources, robust financial management practices, and clear communication of financial decisions to stakeholders.

Lag Indicators	Lead Indicators
- Reserve fund supporting annual operating budget (target: 4 months) - Budget variance (target: within 10% of planned)	- Number of financial reports provided to Board & public (target: monthly to Board) - Audit completed before state deadline (target: Dec. 31)

CAC Meeting Highlights – October 27, 2026

Summary of items discussed at the Citizens Advisory Committee meeting held October 27, 2026. The full minutes will be provided once the CAC approves them at its next meeting.

Items Discussed

Topic	Summary
Public participation	A CAC member, speaking as a member of the public, shared a comparison of LRAPA website air quality readings and PurpleAir sensor data from the August 6 smoke event. Staff will explore adding a shorter-average reading to the website during wildfire season.
Drone methane detection presentation	Ashley Dearden, Permit Writer, presented on drone-based methane monitoring at Short Mountain Landfill, which has found more leaks, including in steep areas that could not previously be monitored. Members discussed leak correction and methane capture.
CAC applicant	The Committee interviewed Jeremy Alberts of Sierra Pacific Industries, an applicant for one of the vacant seats. By unofficial voice vote, members unanimously agreed to table a recommendation until the CAC discusses its composition in November.
Roundtable	Chris Cline from ODF reported that fire season has ended and thanked LRAPA for its communication. Staff responded to community questions about the proposed TV Butte project, noting LRAPA currently has no role in it.
Upcoming CAC topics	The November meeting will focus on CAC composition, member roles, and Chair and Vice Chair selection.

LANE REGIONAL AIR PROTECTION AGENCY

FUTURE BOARD AGENDA ITEMS

2026

January
- ~~Preview upcoming appointments on board and committees.~~
- ~~City of Eugene Public Health Standards Code Amendments~~
- ~~Director's Contract Approval~~

February
- ~~Oakridge Air Update~~
- ~~FY'25 Audit Report & Presentation~~
- ~~Appoint new Budget Committee members, and appoint Budget Officer~~

March
- ~~Potential Supplemental Budget~~
- ~~Budget Committee Meeting for FY'26-27~~
- ~~Elect the Board Chair and Vice-Chair~~

April
- ~~Budget Committee Meeting for FY'26-27~~
- ~~Budget Approval~~
- ~~Legislative Short Session Review~~
- ~~Auditor Engagement Update~~
- ~~Special Revenue Fund Name Change~~

May
- ~~Public Hearing of FY'26-27 Approved Budget, Board Adoption~~
- ~~Caselle Update on Resolution #26-01~~
- ~~Air Toxics & Cleaner Air Oregon Presentation~~

June
- ~~Rivers 2 Ridges Rx Burning Presentation~~
- ~~General Fund Revenue Strategy Discussion~~
- ~~Executive Session, Personnel & Staffing~~

July
- ~~Asbestos Rules, Hearing Request~~
- ~~General Fund Revenue Strategy & ACDP Annual Fee Options~~

August
- ~~No Meeting~~

September
- ~~ACDP Program Costs and Fee Structure~~
- ~~Review Local Partner Dues Calculation for FY'26-27~~
- ~~Annual Review of Board Designated LGIP Account~~
- ~~Data Center Development and Air Quality in Lane County~~
- ~~Exec. Director Performance Evaluation Process & HR Support~~

October
- ~~Approve Local Dues Calculation for FY'26-27~~
- ~~Asbestos Rules, Public Hearing and Possible Adoption~~
- ~~Air Quality Rules Update, Hearing Request~~
- ~~2-Cycle Equipment Emissions~~
- ~~Interagency Mobile Source Coordination~~

November
- Executive Director Performance Evaluation
- Asbestos Rules, Public Hearing and Possible Adoption
- Artificial Intelligence at LRAPA
- Board Member Recognition

December
- No Meeting

2027

January
- Preview upcoming appointments on board and committees.
- Air Quality Rules, Public Hearing and Possible Adoption
- Oakridge Air update

February
- Appoint new Budget Committee members, and appoint Budget Officer
- Air Quality Rules, Board Adoption (If needed)
- Elect the Board Chair and Vice-Chair

March
- Potential Supplemental Budget
- Budget Committee Meeting for FY'27-28

April
- Budget Committee Meeting for FY'27-28; Approve Budget
- Executive Director's Performance Evaluation Process

May
- Public Hearing of FY'27-28 Approved Budget, Board Adoption
- Oakridge Air Update

June
- Outdoor Burning Season Review

July
- Rulemaking Review
- Review PERS UAL Liability & Investment Strategy

August
- No Meeting

September
- Review Legislative Long Session
- Review Local Partner Dues Calculation for FY'27-28
- Annual Review of Board Designated LGIP Account
- Annual Fee and Program Cost Update

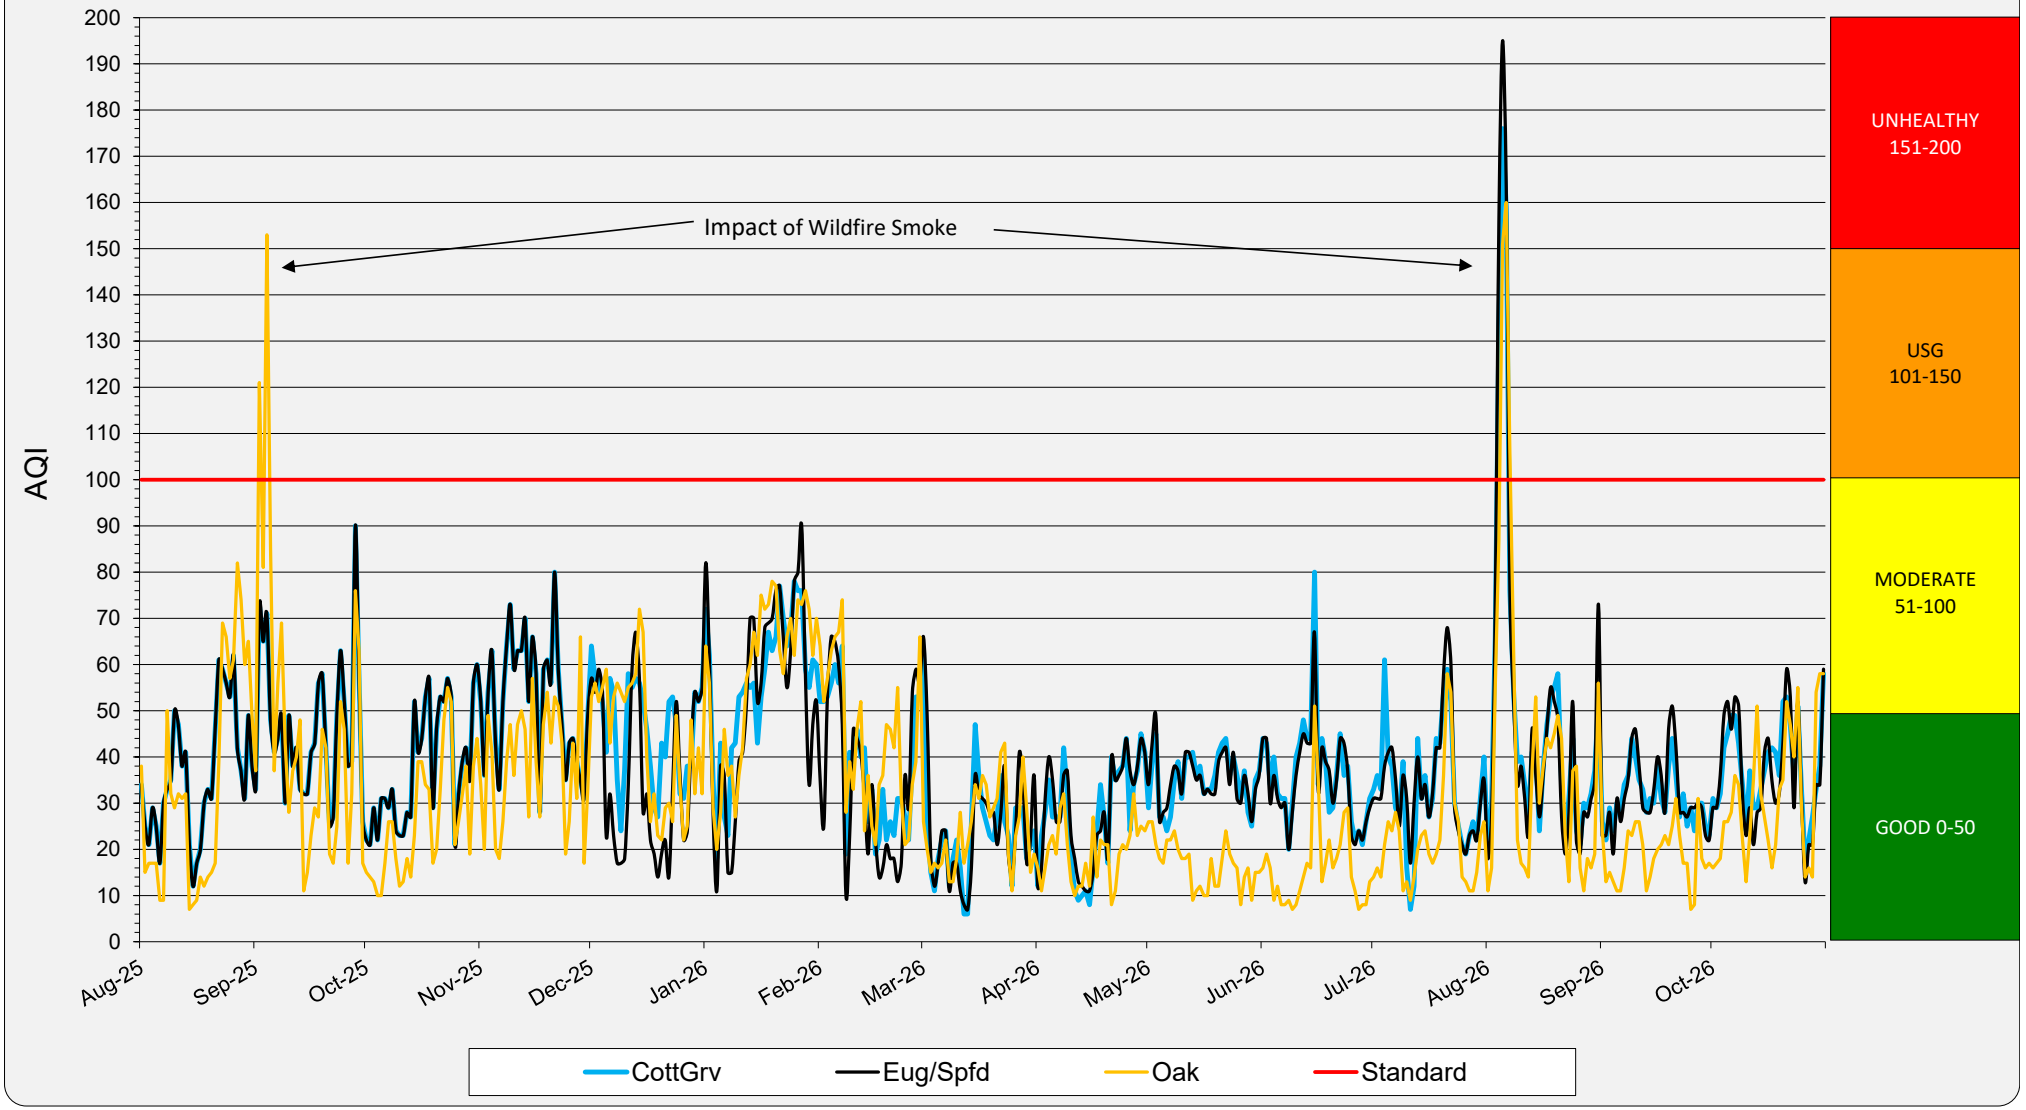

October
- Approve Local Dues Calculation for FY'27-28.
- Smoke Management Season Update/Review

November
- Audit Update, FY'27-28
- Home Wood Heating Season Update

December
- No Meeting

Daily Air Quailty Index (AQI) Chart

This 15-month chart demonstrates the seasonality of the pollutants.

NEW/OPEN ENFORCEMENT ACTIONS DETAIL REPORT
10/01/2026 – 10/31/2026
Report of open actions initiated since last report

NEW (Enforcement actions issued in the current reporting period):

1. FORREST PAINT (EUGENE)

   A. Violation: It is alleged that during the 5/28/2026 Full Compliance Evaluation (FCE) at Forrest Paint's 990/1011 McKinley St. facility in Eugene, OR, four Permit violations were found. These included the unapproved replacement of Emission Unit (EU) 7 Solvent Still and bypassing the Biofilter which acts as a Pollution Control Device (PCD), not maintaining a weekly vessel coverage inspection record, not taking corrective actions and reporting to LRAPA when the Biofilter parametric monitoring values fell outside of those outlined in the approved O&M Plan, and not maintaining an upset log.

   B. Initial Action Taken: NON #3983 issued 10/14/2026

   C. Subsequent Action: PENDING

   D. Resolution: PENDING

   E. Source type: ACDP

   F. Initiated By: INSPECTION

PENDING (Enforcement actions issued prior to 09/01/2026 with <u>subsequent</u> action in the current reporting period):

PENDING (Enforcement actions issued prior to 09/01/2026 with <u>no reporting</u> action in the current reporting period):

1. SWANSON GROUP MFG. LLC (SPRINGFIELD)

   A. Violation: Exceeded permitted visible emission (opacity) limits from the wood-fired boilers (EU-1) in violation of Title V Operating Permit #207510, Condition 20. Six (6) excess emission events occurred in reporting year 2024 and two (2) in reporting year 2025. All events except the event on 1/11/2024 were reported in the semi-annual reports for those periods.

   B. Initial Action Taken: NON #3960 issued 06/30/2026

   C. Subsequent Action: NCP #2026-3960 ($22,200) issued 06/30/2026. Respondent requested a penalty reduction with a compliance schedule on 07/17/2026. SFO #26-3960 was fully executed 09/22/2026. The penalty is settled at $0 in exchange for a

covered hog fuel storage structure, to be completed by 03/31/2027, and installation of a Continuous Opacity Monitoring System (COMS) within 12 months of the renewed Title V permit. Progress reports are due every 60 days. If Respondent misses either requirement, the full $22,200 becomes due and stipulated penalties of $1,800 per week apply.

D. Resolution: PENDING (SFO compliance schedule)

E. Source Type: TITLE V

F. Initiated By: INSPECTION AND REPORTING

2. RADIUS RECYCLING (EUGENE)

A. Violation: Outdoor burning where prohibited and outdoor burning of prohibited materials.

B. Initial Action Taken: NON #3951 issued 1/14/2026

C. Subsequent Action: NCP #2025-3951 ($26,435) issued 06/30/2026; request for reduction received and is under review.

D. Resolution: PENDING

E. Source Type: OUTDOOR BURNING

F. Initiated By: COMPLAINT

3. DUST 2 DIAMONDS, LLC (SPRINGFIELD)

A. Violation: Performed an asbestos abatement project without possessing a license to perform asbestos abatement; openly accumulated friable asbestos-containing materials.

B. Initial Action Taken: NON #3908 issued 9/6/2024

C. Subsequent Action: NCP #2024-3908 ($8,400) issued 9/6/2024; request for reduction approved and reduced to $4,800 with a payment plan of $100; is current with payments 09/01/2026.

D. Resolution: PENDING

E. Source Type: ASBESTOS

F. Initiated By: INSPECTION

4. JANICE CASTLE & JEFFREY HEITZMAN (EUGENE)

A. Violation: Outdoor burning of prohibited materials (plywood and treated lumber wrapped in metal fasteners)

B. Initial Action Taken: NON #3963 issued 06/23/2026

C. Subsequent Action: NCP #2026-3963 ($8,088) issued 06/23/2026; no response, a default order and judgment (DOJ) in process 08/01/2026.

D. Resolution: PENDING

E. Source Type: OUTDOOR BURNING

F. Initiated By: COMPLAINT

5. ALPINE ABATEMENT ASSOC., INC. (EUGENE)

A. Violation: During an asbestos abatement inspection, LRAPA observed the following violations of LRAPA Title 43 - Asbestos Requirements of interim storage location for waste was left unsecured and labeled; negative pressure enclosures did not have viewing windows installed to allow for observation of the abatement area; did not maintain a proper NPE during the project. Containment was cut open during abatement to install a viewing window.

B. Initial Action Taken: NON #3965 issued 06/23/2026

C. Subsequent Action: NCP #2026-3965 ($19,200) issued 06/23/2026; request for reduction received and is under review 07/15/2026.

D. Resolution: PENDING

E. Source Type: ASBESTOS

F. Initiated By: INSPECTION

6. EDWARD LITTEN (NOTI)

A. Violation: Outdoor burning of prohibited materials, burned at night outside of allowed outdoor burning times as set by LRAPA outdoor burning advisory, and burned construction and demolition debris without an Outdoor burning Letter issued permit.

B. Initial Action Taken: NON #3967 issued 06/23/2026

C. Subsequent Action: NCP #2026-3967 ($3,850) issued 06/23/2026; no response, a default order and judgment (DOJ) in process 08/01/2026.

D. Resolution: PENDING

E. Source Type: OUTDOOR BURNING

F. Initiated By: COMPLAINT

7. JEFFREY HEITZMAN & JANICE CASTLE (EUGENE)

A. Violation: Outdoor burning of prohibited materials including construction/ demolition debris.

B. Initial Action Taken: NON #3948 issued 1/15/2026

C. Subsequent Action: NCP #2025-3948 ($3,388) issued 1/15/2026; no response, a default order and judgment (DOJ) in process.

D. Resolution: PENDING

E. Source Type: OUTDOOR BURNING

F. Initiated By: COMPLAINT

8. REMEDIOS ROMERO (COTTAGE GROVE)

A. Violation: Respondent conducted the burning of prohibited materials, including painted wood, metal, tin cans, plastic bags, food waste, plastics fiberglass roofing and general household garbage in a burn barrel.

B. Initial Action Taken: NON #3930 issued 08/06/2025

C. Subsequent Action: NCP #2025-3930 ($1,019) issued 08/06/2025; no response, a default order and judgment (DOJ) in process.

D. Resolution: PENDING

E. Source Type: OUTDOOR BURNING

F. Initiated By: COMPLAINT

9. LANE FOREST PRODUCTS (EUGENE)

A. Violation: Lane Forest Products has not been conducting the required monthly fugitive emission surveys as outlined in ACDP 204741 Permit Condition 12 of their current permit (issue date 6/4/2024) which is the required monitoring component of preventing excess emissions of particulate matter.

B. Initial Action Taken: NON #3950 issued 04/13/2026

C. Subsequent Action: PENDING

D. Resolution: PENDING

E. Source Type: ACDP

F. Initiated By: COMPLAINT

CLOSED ENFORCEMENT CASES Enforcement closed in the current reporting period 10/01/2026 – 10/31/2026):
